HOW TO LOAD THE TRAINING KIT PROGRAM:

NOTE: We recommend that you familiarize yourself with the first section of your workbook before loading the program. If you are familiar with the information contained in the first section, follow the below instructions to begin.

1. Turn computer on.
2. Turn disk drive on and insert diskette.
3. Type: **load "training kit",8.** Then press the **RETURN** key.
4. Wait until computer reports ready. Then type: **run** (and press **RETURN**).
5. Follow the instructions on your screen.

IN CASE OF ERRORS:

Turn off the computer and disk drive and start again. If this does not solve the problem follow the below instructions. (This will work with other programs too!)

1. Find the "1541 Test/Demo" disk that came with your disk drive.
2. Turn computer and disk drive on.
3. Insert "1541 Test/Demo" disk in drive.
4. Type: **load "c-64 wedge",8.** Then press the **RETURN** key.
5. Wait until computer reports READY. Then type: **run** (and press **RETURN**).
6. Return to the instructions above and attempt to re-load the training kit.
7. If the program still gives you trouble press the @ key. An "error code" message will report to your screen.
8. Look up this "error code" on pages 40-46 of your 1541 Disk Drive Users Manual.
9. If you still can't solve the problem send your diskette into Northwest with an explanation of the error and your receipt. If the problem occurs within 90 days of purchase your diskette will be replaced.
